Knee Exo Spring Mount & Guide

Crash Makerspace

21 nov 2025

These are the files for the Spring's Guide-Cover and upper mounting block. Hardware is the same as listed in the base [Exo Knee Hinge Post](#).

ASSEMBLY

You'll need Nuts that interface with the [Threaded Rods](#) used as the frame and to adjust where the mount starts. Then just 1 bolt that holds the spring to the mount which acts as an axle.

- X6 [Nuts](#)
- X2 [M5 Spring Bolts](#) (+ [M5 Nuts](#))
- X2 [Springs](#) (I got mine at a tractor hardware store, but the steel with something like the one linked. Due to spring steel elongation hinge track, I would stay between 160mm to 200mm long for the

Would love to hop on a call sometime, let me know. DM

**Luke** · 5/mes

What is the best print orientation?

**Crash Makerspace** AUTOR · 5/mes

I print each part vertically just like as shown in that blender shot really, but when slicing I do flip the mounts upside down
